

Peaceable Kingdom Essentials Flea Flicker Spray & Bar Soap

There is so much information in the media today about all the harmful products that we should **NOT** use on our pets it has many pet owners asking themselves, "What exactly **IS** safe to use on Fluffy & Fido?"

When it comes to flea control, you really don't want to mess around. You don't want to leave your pet susceptible to fleas, which in turn can make your home a breeding ground for the pests, but you also don't want to put some chemical based product on your pet that is going to irritate your pet's skin or possibly cause other health complications. Therefore, as a happy medium, any responsible pet owner wants to look at organic flea control options for their dog or cat.

Effective flea control means balancing toxicity to fleas and safety for pets and people. There is a pet product company that is centered completely on herbal, organic, and natural treatments for protecting your pet against fleas and other insects. Peaceable Kingdom Essentials natural flea control solution offers a way to achieve that delicate balance.

Our ingredients in our spray address the challenges faced with fleas:

Neem Leaf, The neem tree holds a great deal of promise for India as a wonder plant with many uses. The leaves have antibacterial and antiviral properties, and are often used in cosmetic and skin treatment preparations. It is an effective insect repellent, and its astringent properties make it an excellent treatment for skin conditions ranging from acne to eczema. It is used to treat ringworm and other parasitic skin infections and promotes healing of wounds. (Ingredient in both spray & soap)

Fever few and *Chrysanthemums* contain certain compounds known as **pyrethrins** which have paralytic effects on fleas.

Mullein flowers applied externally is a good wound healer and also contains the compound rotenone and a synergy of other insecticidal compounds making it effective in the fight against fleas and mange

Eucalyptus, is a great flea prevention ~~ fleas hate the smell of the Eucalyptus.

Nettle is an instantaneous contact dermatitis that is characterized by tiny blisters and a burning sting. It is an excellent skin and coat rinse that nourishes animals' fur and provides symptomatic relief for itchy skin and fleabites

Rose Geranium (hydrosol), an excellent tick repellent

Sweet Orange Essential Oil

Fortunately, the scented oils fleas dislike happen to have pleasant scents. Peppermint, lavender, citronella, cedar, rosemary, lemon and orange essential oils chase fleas away without smelling noxious to people or animals.

Our Flea Flicker Bar Soap contains the following ingredients: Organic Neem Leaf, Organic Chrysanthemum Powder and essential oils.

It is safe for cats, dogs and even humans! It smells so yummy you may want to take a bite, but please don't--it is for external use only!

Peaceable Kingdom Essentials is a great alternative for the pet owner who wants to protect their pet, but who also doesn't want to endanger their health through the application of poison and other chemicals.

Suggested Use

For Dogs

- Spray thoroughly on fur, including legs and stomach, rubbing it in if necessary.
- Repeat weekly, or as needed depending on the severity of the insect problem.
- Always reapply after bathing or when your dog gets completely wet.
- Be careful not to spray in the eyes, nose, or mouth.

For Cats

The essential oils used in this formula are very diluted and should be well tolerated by most cats; however, a small number of cats may be sensitive to them, so use the spray lightly, particularly on the first application. For cats that dislike having spray applied directly on them, spray Flea Flicker Spray lightly on a cloth and then rub the cloth over your cat, or apply sparingly with a cotton ball around ears or other vulnerable areas, avoiding the eyes, nose, and mouth.

Caution

Discontinue use if your pet shows any change in condition that concerns you, and contact your veterinarian if problem persists.

Please remember, this product is a repellent and you may use small amounts, especially before going outside. The spray is **non-staining**; however in large amounts, the essential oils *may* temporarily discolor white hair or fur. If you notice discoloration that you dislike on your pet, wash your dog with a shampoo or dishwashing liquid that contains detergents, as this is the most effective way to remove the oils.
